

Summary of Qualifications

Full Stack Web Developer.

In 2020 I decided to start learning to program, and since then, I have made a lot of projects like websites, frontend and backend, discord bots using node.js, games using Unreal 4, and cyber security, some for companies and others to improve my programming skills. I'm also a student at 42 Lisbon which is considered one of the best programming schools in the world.

While in school I took all my free time to study several programming languages like Python, Lua, and JavaScript.

I am always eager to develop new skills and very motivated to join new projects.
